The Famous Hamilton "992" Railroad Model

*"The Railroad Timekeeper
of America"*

This new cased railroad model gives you the time-proved accuracy and dependability of the Hamilton 992 in a case that is specially designed for the rigors of railroad service. The case is sturdily wrought from filled gold and is made practically dust-proof by the unique construction described below. The bow is fitted with a cross bar screw that admits of adjustment and prevents pulling out.

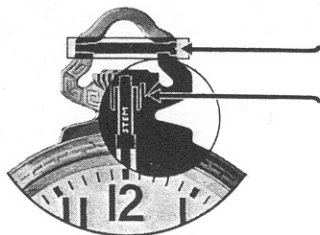

14K Gold Filled, White or Green, \$65.00

*It Says to Dust
"Keep Out"*

This bar screw holds bow in place and provides for adjustment when needed.

There are seven sharp corners to stop dust which might possibly leak into the stem housing around the winding crown. If the dust manages to penetrate this far it is stopped by the special dust-proof lubricant packing, thus protecting the fine 21 jewelled 992.
