Hamilton Watch

"The Watch of Railroad Accuracy"

The Hamilton Watch Company was established in Lancaster, Pennsylvania, U. S. A., in 1892, and has grown slowly, but surely and steadily since the days of its founding, until today, it has a capital of $10,000,000.00 U. S. Gold, fully paid in and a force of 1,200 experts employed in the daily production of 700 HAMILTON WATCHES of 17 jewels or more.

Since January 1, 1928, the Hamilton Watch Company owns and controls the entire assets, good will, trade name and plant of the Illinois Watch Company, located at Springfield, Illinois. The Company will continue to operate the Illinois factory along the same high grade lines, using the Illinois trade name as well, thereby combining under one ownership, the two great American watch factories specializing in the manufacture of high grade timepieces exclusively.

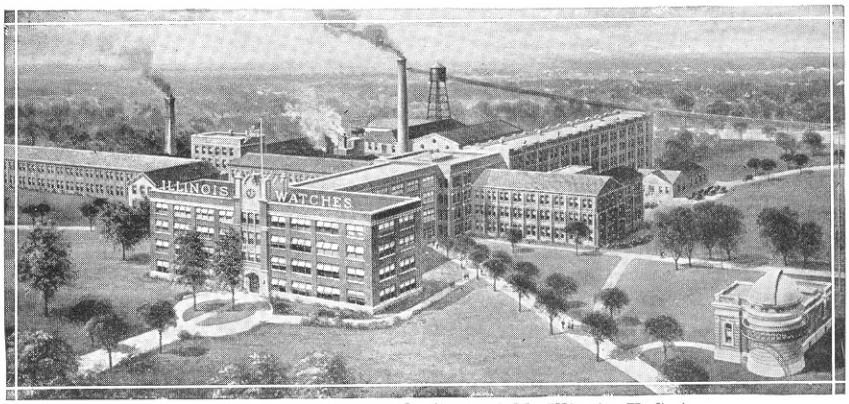

Home of the Hamilton Watch, Lancaster, Pennsylvania

HAMILTON and ILLINOIS watches are made of the very finest materials obtainable. They are built by the best skilled workmen in perfectly equipped plants. Both have records of most phenomenally accurate time keeping.

Every Hamilton and Illinois carries with it a guarantee of satisfaction. No watches are permitted to leave either factory until they have passed the most exhaustive scientific tests as applied to accurate time keeping. The Hamilton factory is ideally situated in the midst of a delightful park of over thirteen acres, which lends itself to the making of these high grade timepieces.

The ILLINOIS WATCH

SINCE 1870 AT
SPRINGFIELD, ILLINOIS

Home of the Illinois Watch, Springfield, Illinois, U. S. A.
Owned and Controlled by Hamilton Watch Company

The Illinois factory confines its entire production to high grade timepieces, exclusively. Its history in the watch-making industry dates back to 1870 when the company was established at its present location in Springfield, Illinois. During this period the organization has grown from a small unit to an institution which engages the services of approximately 1,300 employes. The personnel consists of skilled workmen who have had years of experience in the art of fine watchmaking. The factory is situated in the center of a fourteen-acre park—all conditions lending themselves splendidly to the making of these famous watches.

The Export Sales Division, handling the export of Illinois Watches is located at the main office of the Hamilton Watch Company, Lancaster, Pennsylvania.

Hamilton Watch

"The Watch of Railroad Accuracy"

THIS Catalog of HAMILTON and ILLINOIS WATCHES has been prepared to enable you to select with ease the types of high grade timepieces for both pocket and wrist wear, most suitable for your requirements.

We have endeavored to make the selection of a range of watches very simple by assigning to each watch, or in other words, each combination of case and movement, a catalog number, as well as indicating each dial by number.

To avoid errors, when ordering, it is advisable to quote, not only the catalog numbers of the watches and dials selected, but to give a complete description of same, according to the catalog.

Cables

Our cable address is: HAMILL, LANCASTER.

For your convenience, we have arranged a five-letter code word for each watch listed, as well as for each dial, and by combining the code words for the watch and dial, the full description of the watch is embodied in one cable word. This code may be used with any standard five-letter code.

We use Western Union—5 Letter Edition.

Shipments

All merchandise, both HAMILTON AND ILLINOIS, will be despatched from our Export Headquarters, which are located at the main offices of the Hamilton Watch Company, Lancaster, Pennsylvania, insured under our open policy against all marine risks, including theft and breakage as well as War Risk (when required) for your account unless advised to the contrary. The nature of our products permits the use of the International Parcel Post System. This makes it possible to despatch our products to practically all countries throughout the world, very inexpensively.

Repair Parts

HAMILTON and ILLINOIS movements are all standardized. All parts of any given size or grade being interchangeable, thus making it very easy for the watchmaker to repair any damage that may occur to these movements.

To insure the proper repair of our products, by the use of genuine factory made parts, we have compiled catalogs covering the complete lines of Genuine Watch Material for Hamilton and Illinois Watches.

We will be pleased to furnish a copy of either or both Material Catalogs on request.

"The Watch of Railroad Accuracy"

18K Gold Masterpiece
Model "A"
Catalog No. 1501

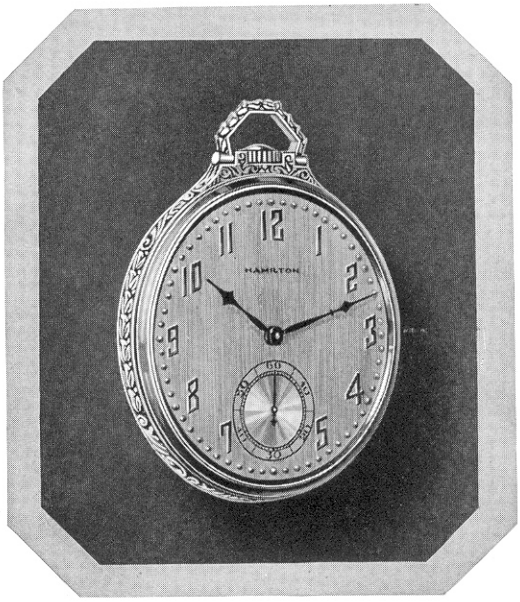

18K Gold Masterpiece
Model "B"
Catalog No. 1502

The Masterpiece Group

Hamilton Masterpiece in 18K Gold

Altogether worthy the name Hamilton—are these remarkable examples of the watchmaker's craft. The cases are fashioned of extra heavy 18K white or green gold, hand made throughout and richly carved. All Masterpiece models are fitted with the Hamilton 23 jewel Masterpiece movement, adjusted to heat, cold, isochronism and five positions; have patent motor barrel, gold train, steel escape wheel, double roller escapement, sapphire pallets, micrometric regulator, Breguet hairspring and compensation balance. The dials are of sterling silver, brushed or lined finish, with raised numerals of 18K gold.

This movement is illustrated on Page 19.

The New Hamilton Masterpiece In Platinum
Catalog No. 1503

Hamilton Masterpiece in Platinum

Hamilton has designed this remarkably fine watch in response to insistent demands for a Hamilton Masterpiece movement in a platinum case. This model is entirely new. The bezel is a simple circlet of platinum while the center and bow are richly carved in high relief.

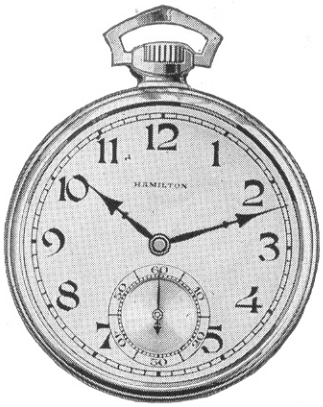

The dial of sterling silver has raised numerals of solid gold and solid gold hands. The Hamilton Masterpiece in platinum is a watch altogether unusual in appearance and in accurate timekeeping performance.

The ILLINOIS WATCH
SINCE 1870 AT SPRINGFIELD, ILLINOIS

23 Jewel 16 Size

Sangamo Special

6 Position - Adjusted - Motor Barrel 60 Hour Watch

The Sangamo Special is an extremely high grade, 23 jewel, 16 size, complete watch, adjusted to 6 positions and is guaranteed to run more than 60 hours on one winding. This watch is considered by the makers as the "last word" in railroad watches.

All material used in the construction of this watch is of the highest quality and made as accurate as human skill and the latest improved machinery can produce. Each part is individually fitted, one to the other, into the watch it is intended for.

The case, by Wadsworth, is of special and unique design, extra heavy and durable. The bezel, back, and inside cap are hinged. These cases are furnished in 14K green, white or yellow gold filled, or 14K green, white or yellow solid gold. Also in a plain screw back and bezel case of nickeloid.

Movement Specifications

23 selected ruby and sapphire jewels; adjusted to 6 positions, heat, cold and isochronism; solid gold raised jewel settings; hardened and tempered compensating balance with solid gold screws, including meantime screws; hardened and tempered Breguet hairspring; polished gold strata train wheels; double roller escapement; entire escapement cap jeweled; hardened and tempered beveled and polished steel escape wheel; concaved and polished steel winding wheels; positive micrometric screw regulator; safety recoil click; Illinois Superior Jeweled Motor Barrel with 60 hour mainspring. Dials: Choice of double sunk glass enamel heavy Arabic or Montgomery, also Butler center silver with railroad figures.

The ILLINOIS WATCH
SINCE 1870 AT SPRINGFIELD, ILLINOIS

23 Jewels *Bunn Special* 16 Size

60 Hours - 6 Positions - Motor Barrel

For more than a quarter of a century, Illinois watches have been leaders in railroad service, owing to their durability and accurate time keeping qualities.

The 23 jewel, Bunn Special is the perfected railroad watch and is the last word in timing the trains. It so far exceeds the requirements of North American railroads that it will meet all service demands of the future. It is our opinion that this watch cannot be surpassed for satisfactory and dependable railroad service, and constitutes the best value in timepieces ever produced.

The extra quality sapphire jewels for bearings of both pivots of the going arbor of the motor barrel in the 23 jewel Bunn Specials, greatly reduces friction and adds to the perfection of the construction of these exceptionally fine railroad watches.

ENGRAVED MODEL
Montgomery Dial

Above model furnished in 14K white or green gold filled also green center with white back and bezel Keystone case. Montgomery double sunk, glass enamel dial, heavy Arabic figures also furnished with Butler center silver dial, Railroad figures.

Special Design Case

The 23 Jewel Bunn Special cases were designed by Keystone especially for this model. They are very unique in design, showing strength of character in every line. They have been termed by many as the most attractive Railroad cases of recent manufacture. The cases are screw bezel and back. The bows are absolutely non-pull-out, while the pendant, in fact the entire case, is dust proof.

KNURLED MODEL
Heavy Arabic Dial

Above model furnished in 10K yellow gold filled Keystone case. Dial is double sunk, glass enamel Heavy Arabic figures.

The 23 Jewel Bunn Special Movement

16 Size 23 Jewels — Three-Quarter Plate Model

Adjusted to 6 positions and heat, cold and isochronism; raised gold jewel settings; spring tempered compensating balance with solid gold screws; polished gold beveled train wheels; double roller escapement and entire escapement cap jeweled, steel escape wheel; Breguet hairspring; concaved and polished steel winding wheels; positive micrometric screw regulator; safety recoiling click; Illinois Superior Jeweled Motor Barrel.

SPRINGFIELD, ILLINOIS

21 Jewel Bunn Special

60 Hours - 6 Positions - Motor Barrel

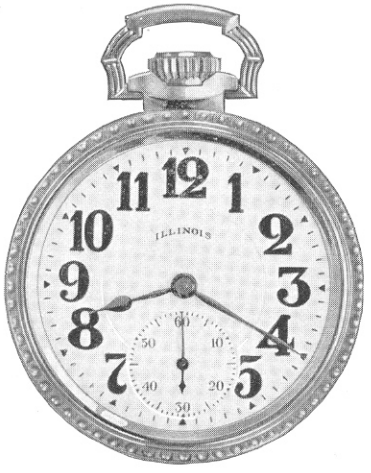

Above model furnished in 14K white or green gold filled Wadsworth case.
Dial No. 115.

The 21 Jewel Bunn Special, 16 size, high grade railroad watch is standard for railroad service. Its Superior Motor Barrel permits the use of a longer, thinner mainspring which drives the watch more than 60 hours from one winding—a tremendous factor of safety, since the watch will maintain its even, accurate rate for more than 48 hours. It is a watch that is giving railroad men everywhere complete satisfaction in every way. For more than a quarter of a century the Bunn Special has been recognized for its superior timekeeping qualities. Its sturdy mechanical construction, together with the most modern improvements, consisting of the Illinois Superior Motor Barrel and the 60 hour running feature, has made it a leader in its line.

Special Design Case

The cases, designed by Wadsworth, are the result of their years of experience in the making of fine watch cases. These movements are fitted, timed and rated in their cases at the factory. Both styles of cases are made with screw back and bezel, the metal used being much thicker than is usually found in standard 16 size cases. The bows are absolutely non-pull-out, and pendant contains a special dust-proof feature, making it impossible for dust or dirt to work through into the movement.

Above model furnished in 10K yellow gold filled Wadsworth case.
Dial No. 114.

The 21 Jewel Bunn Special Movement

16 Size 21 Jewels — Three-Quarter Plate Model

21 selected ruby and sapphire jewels; 9 adjustments; 6 for positions and 1 each for heat, cold and isochronism; solid gold raised jewel settings; hardened and tempered compensating balance with Breguet hairspring; double roller escapement; hardened and tempered beveled and polished steel escape wheel; positive micrometric screw regulator; safety recoil click; Illinois Superior Motor Barrel with 60 Hour mainspring.

The Illini

Extra Thin 21 Jewels
Adjusted 5 Positions

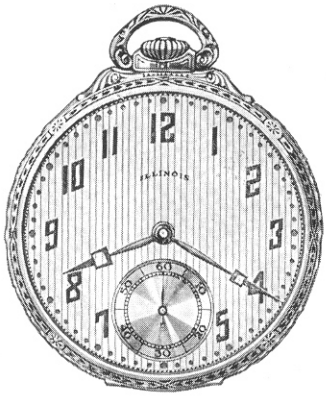

Catalogue No. 2701
14K solid white gold, extra heavy hand carved case; Butler or etched back. Etched dial with figures in relief. No. 53.

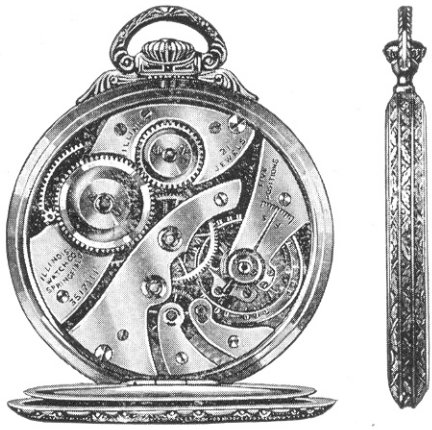

The beautiful Illini was especially designed and made for the man who demands an attractive, durable and accurate timepiece in an extra thin watch. It is the highest grade thin model made by Illinois and is unequalled in quality and style at the price.

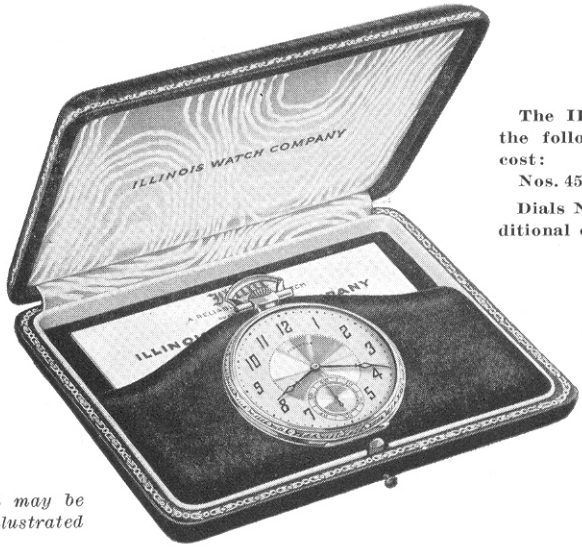

The movement contains 21 extra quality large ruby and sapphire jewels; special tempered compensating center arm balance; is adjusted to heat, cold, isochronism and five positions. The Illinois Superior Motor Barrel, with both pivots of barrel staff operating in sapphire jewels, is one of its special features. This exceptionally fine movement is supplied only in exclusive and distinctive designed 14K solid gold cases.

The ILLINI is handsomely boxed in a Morroco leather display package.

Catalogue No. 2702
14K solid extra heavy white gold hand carved case with inlaid black enamel decoration; Butler back with sterling silver dial with 18K applied figures. No. 39. Extra.

The ILLINI is furnished with the following dials at no extra cost:

Nos. 45, 48, 49, 50, and 53.

Dials No. 38, 39, and 57 at an additional charge.

Additional dials which may be had on the ILLINI are illustrated on Page 37.

EXTRA THIN

A. Lincoln

19 JEWELS

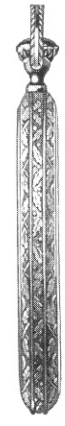

A Timekeeper Worthy Of Its Name

ADJUSTED 5 POSITIONS

The A. Lincoln is a timepiece worthy of its name because of its satisfactory qualities and dependability. It is the result of a half century of experience in the art of making fine watches. The A. Lincoln is built with the painstaking care of the master watchmaker. The selection of materials used in the construction of this watch is based upon knowledge gained through years of specialization in the manufacture of high grade timepieces—such is the assurance of its quality.

There is a mark of refinement in the selection of the cases which are furnished in either solid or 14K gold filled.

SPECIFICATIONS

19 ruby and sapphire jewels, raised settings; adjusted to temperature, five positions and isochronism; special quality hardened and tempered center arm compensating balance; double roller escapement; sapphire roller and pallet jewels; beveled steel escape wheel; gold center wheel; conical pivots; patent micrometric screw regulator; best quality Breguet hairspring; recoil click; Illinois Superior Jeweled Motor Barrel; concaved and polished winding wheels; damaskeened in bright striped pattern; black enamel lettering.

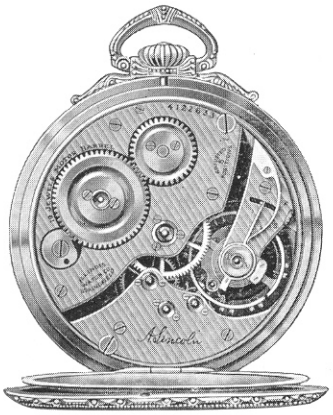

Abraham Lincoln, born in a little log cabin in Kentucky, amid the grinding hardships of poverty, rose to the highest office and place of honor within the gift of the people of the United States of America—serving as President of the Republic from 1861 to the time of his assassination in 1865. He made Springfield his home from 1837 until the day he departed for Washington for his inauguration as President,. His body now rests in a crypt of the monument erected by the people of the nation in the Springfield he loved so well. The A. Lincoln watch was named in honor of this foremost citizen of our city—one of the greatest Americans of all times, was a personal friend of the parents of many of our employes—whose final resting place is but a short distance from our door, and whose memory America today reveres.

Railroad Grade Movements

The two regular 16 size Watch Movements illustrated below are especially designed, constructed and recognized as standard for the exacting service for all railroads in North America, who require every man employed in the operation of trains to possess a special high grade watch of determined quality, which is examined and tested periodically by competent watchmakers appointed by the Railroad officials as Official Watch Inspectors. They are equipped with the Illinois Superior Motor Barrel, and are guaranteed to run more than 60 hours on each winding. These movements are the highest of each particular grade and are made of the finest materials throughout. The 23 and 21 jewel 60 hour 6 position Bunn Specials are also supplied as complete watches in especially designed cases, which are fully described on Pages 21 and 22.

SIXTY HOUR BUNN SPECIAL

16 Size, 23 Jewels **Adjusted 6 Positions**
